Why Turn to Us for Medicare Secondary Payer Compliance Issues?

The escalating cost of health care has resulted in the U.S. government assuming an ever-increasing financial burden in paying for medical services for disabled individuals. The Medicare Secondary Payer Act (MSP) requires all parties settling workers' compensation, general liability and no-fault automobile claims to protect Medicare's position as a secondary payer.

In the past, navigating the maze of companies providing Medicare Set-Aside services was a frustrating task and involved multiple steps to accomplish MSP compliance. Securing a Medicare Set-Aside Allocation, submitting the recommendation to the Centers for Medicare & Medicaid Services (CMS) for approval and getting annuity funding/post settlement planning meant dealing with numerous firms—an inefficient, expensive and burdensome process.

Those days are gone.

Synergy is your single solution for Medicare Set-Asides (MSAs)—from creating allocations and submitting them for approval to providing funding options and post-settlement planning recommendations.

We are the premier provider of help to both attorneys and clients in ensuring MSP compliance.
